Title: Scientist, Clinical Pharmacology and Development

Job Summary:
Working within the clinical development organization, the Scientist will support multiple programs, performing PK analyses for Phase 1 studies and provide input to the development of clinical study designs and protocols. A strong background in pharmacokinetics combined with excellent communications skills are essential. This position reports to the Director, Clinical Pharmacology and Development.

Responsibilities:
- Be required to ensure quality and timely delivery of project PK and PK/PD deliverables, participate in scientific reviews of PK and PK/PD developments, and maintain awareness of the field of pharmacokinetics
- Contribute to clinical development plans, clinical sections, statistical analyses plans, PK/PD analyses, clinical study reports and review of other study related documentation (Investigator’s Brochure, Scientific Rationales/Justification, Regulatory agency briefing documents and responses to questions)
- As a member of the Clinical Development team, work closely with Product Planning/Program Management, Non-Clinical and Pharmaceutical Development teams to collect scientific and medical knowledge to support clinical development plans
- Will interact with clinical KOLs
- Attend scientific meetings to stay current of new developments within relevant areas
- Contribute to Investigator Meetings and Study Initiation Visits
- Review and present clinical trial data, prepare presentation material as needed for internal meetings and external meetings and publications
- Be willing to learn and contribute to clinical operations if needed

Qualifications:
- Science background, PhD or PharmD with strong knowledge of PK, modelling and simulation, and WinNonlin software
- At least 5 years clinical research experience in industry
- Experience with conducting Phase 1-3 studies
- Strong leadership, interpersonal, organizational and multi-tasking skills
- Excellent attention to detail and problem solving skills
- Independently motivated
- Ability to get project/task to the next step in an efficient manner
- Capable of changing direction quickly if needed
- Ability to work effectively/congenially in a team setting
- Global travel as needed
