

**Title: Scientist/Senior Scientist, Formulation Development**

**Job Summary:**

This is a laboratory-focused, experienced position within the Formulation Development Group at Concert Pharmaceuticals in Lexington, MA. The Scientist/Senior Scientist will be responsible for formulation development activities within one or more small-molecule development programs, including pre-formulation, process development, drug product characterization, and cGMP drug product manufacture. The qualified individual will collaborate with CMOs to transfer formulation processes to manufacturing sites.

Strong organizational and communication skills are required to collaborate with other staff and complete required activities in a timely manner. The individual must be able to handle multiple competing priorities in a fast-paced environment. Good presentation skills are required.

**Responsibilities:**

- Major contributor to formulation development activities for one or more development programs
- Perform pre-formulation experiments to inform formulation development work
- Develop robust formulation processes and analytical test methods to support advancing programs
- Transfer processes and methods to selected external vendors for cGMP drug product manufacture
- Summarize data and scientific findings in presentations and reports
- Contribute to development of drug product specifications

**Qualifications:**

- Bachelor or masters level education in a life or physical science with 5–10 years of experience
- Demonstrated expertise in solid dosage form development
- Demonstrated ability to troubleshoot formulation process and final drug product issues
- Demonstrated expertise with solid dosage form evaluation such as dissolution testing, powder flow analysis, disintegration, hardness, friability, powder density testing, particle size distribution
- Experience developing and utilizing analytical methods for drug product testing such as HPLC and dissolution
- Knowledge of cGMPs, ICH guidance, and CMC-related regulatory requirements
