

Title: Senior Scientist I/II, Analytical Chemistry

Job Summary

The Senior Scientist I/II will perform method development and product characterization, and oversee method validation, analytical investigations, and stability programs, in support of drug product development. The qualified individual will work closely with scientists within Concert's formulation development group as well as collaborate with CMOs to transfer analytical technologies to manufacturing sites and testing labs. At Concert we value a team approach to problem solving, therefore strong organizational, communication, and collaboration skills are required. You must be able to handle multiple competing priorities in a fast-paced environment. Good presentation skills are expected and attention to detail is essential.

Responsibilities:

- Lead CMC analytical activities for multiple drug product development programs
- Develop robust and appropriate analytical methods to characterize and improve drug product manufacturing processes
- Manage transfer and validation of analytical methods to appropriate phase of development at external CMOs
- Oversee stability programs to support clinical development and regulatory filings
- Work with vendors to ensure sound analytical data and results are reported
- Summarize data and scientific findings in presentations and reports
- Support, maintain, and troubleshoot analytical instruments within the formulation development group
- Contribute to regulatory filings
- Contribute to the development of drug product specifications
- Demonstrate technical proficiency and problem solving in the field of analytical chemistry

Qualifications:

- PhD in Analytical Chemistry or related field with 5+ years of related industrial experience or Master's/Bachelor's degree with 8+ years of related industrial experience
- Demonstrated expertise with HPLC and dissolution applications for small molecule drug products
- Drug product method development, validation, and transfer experience
- Demonstrated experience with solid state characterization techniques (DSC, TGA, XRPD)
- Track record of analytical problem solving
- Ability to work across functional groups and with external CMOs

If you would like to be considered for a job on the Concert team, send your resume in the body text of an e-mail (no attachments please) to: careers@concertpharma.com.
